

COLOR CHANGES

Approved Colors

Replacement of siding and brick must be of original color. Changes to the color of the siding will be approved by the ARB and will be a color consistent with other colors in the community.

Bricks may not be painted unless originally painted by the builder. If repainted, it must be the same as the original color. Otherwise, bricks, steps, and the tops of bay windows shall remain in their original state.

For painted or trim surfaces, McCormick paint was originally used to paint the houses in Selma Estates hence that is our baseline color palette. Other brand paints may be used at a homeowner's discretion, but colors must match this palette and be approved by the ARC. Failure to obtain approval from the ARC before changing a color will result in homeowner being required to return to original color.

Approved exterior colors for houses in Selma Estates can be found in the attached. Before changing the colors on your house, you must obtain ARC approval. Repainting the same color does not require approval (ensure that you are using the original color and not matching a faded original color).

All trim and garage doors will be repainted the original white color (super white 100). The front door and shutters should be painted a darker accent color, consistent with the existing trim colors present in the neighborhood; they must complement and contrast with the siding color. In general, colors for doors and trim should not match those of immediate neighboring homes. Approved colors are in the attached.

EXTERIOR COLLECTION

McCormick Paints produces a full line of high quality Exterior Paints and Primers, field proven for durability in color and sheen, and designed for the Mid-Atlantic climate.
